

Junior Full Stack Developer Intern

TechNova Solutions

About the Role

TechNova Solutions is looking for a Junior Full Stack Developer Intern to join our engineering team. You will work closely with senior developers to build and maintain features across our web platform, gaining hands-on experience with modern frontend and backend technologies.

Required Skills

- Proficiency in React.js for building frontend interfaces
- Experience with Node.js for backend development
- Familiarity with MongoDB or another NoSQL database
- Understanding of REST API design and implementation
- Comfortable using Git for version control

Nice to Have

- Experience with Express.js
- Familiarity with Docker
- Exposure to cloud platforms such as AWS or GCP
- Basic understanding of CI/CD pipelines

Responsibilities

- Assist in developing and maintaining web application features
- Write clean, maintainable, and well-documented code
- Collaborate with the design and backend teams to implement new functionality
- Participate in code reviews and testing
- Debug and resolve issues reported by QA or users

Qualifications

- Currently pursuing or recently completed a degree in Computer Science or related field
- Basic understanding of data structures and algorithms
- Strong problem-solving skills and eagerness to learn
- No prior professional experience required, internship or academic project experience is a plus
