Education

B.Tech in Computer Science, Manipal Institute of Technology, 2023-2027

Relevant coursework: Data Structures, Operating Systems, Database Management Systems

Skills

Languages: JavaScript, Python, HTML, CSS

Frontend: React.js, Redux, Tailwind CSS

Backend: Node.js, Express.js, REST API design

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, Docker (basic)

Projects

Campus Marketplace App

- Built a full stack web application using React.js for the frontend and Node.js with Express.js for the backend
- Designed and implemented REST APIs for user authentication, product listings, and order management
- Used MongoDB as the primary database with Mongoose for schema modeling
- Deployed the application using Docker containers

Personal Finance Tracker

- Developed a React.js single page application to track expenses and visualize spending patterns
- Built a Node.js backend with REST endpoints for CRUD operations on transactions
- Used Git for version control throughout development, with feature branches for each module

Internship Experience

Frontend Developer Intern, LocalStartup Inc. (Summer 2025)

- Contributed to a React.js codebase, building reusable UI components
- Collaborated with backend engineers consuming REST APIs built in Node.js
- Participated in code reviews and used Git for collaborative development

Certifications

- Full Stack Web Development, Coursera
